 May 27, 1937 that admission to bath houses within the jurisdiction of the Commis-

 the following facts to the Governor's attention:

It was the opinion of the Commission that if any of the bath houses were to be put on a free basis, all of them should be treated in the same way.

In the event that admission to all bath houses was free, it would be necessary, in order to prevent the destruction of its property, for the Commission to greatly increase the number of police and attendants, for which there is no provision in its budget.

The Board was of the further opinion that to open these bath houses without charge would result in such tremendous overcrowding as to make the bath houses entirely inadequate to render reasonable service as its experience has shown that even at a twenty-five cent charge there are frequent occasions in hot weather when the demand is beyond capacity.
